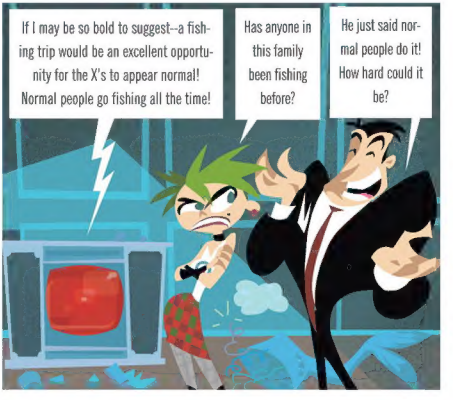
NICKELODEON
the Xs
EEAAAGH!
"IN LIKE FISH"

What happened?
The trophy swordfish attacked me!
The T-9000 Security Fishbot? I thought that thing was broken. Who got it to work?
Depends. Is whoever fixed it in trouble?

Now we need a new fish to maintain our cover as a normal nonspy family. Normal people have dead things on the walls.
How about dead things in the basement?
Someone's supposed to be coming for those.



If I may be so bold to suggest--a fishing trip would be an excellent opportunity for the X's to appear normal! Normal people go fishing all the time!
Has anyone in this family been fishing before?
He just said normal people do it! How hard could it be?

Ow! It's like dozens of tiny razors poking my skull!
They're barbed. They go in, but they don't come out.
Diabolical!
I *told* you the hooks go on the *outside* of the hat.
Well, don't pull! Laser them off! Ow!

Sorry about your hair. The new disintegrator looks just like a laser. I need to label them.
Burned hair smell! Ew!
All right. We're not here for fun. Engage Operation Trophy Fish! Put on your water camouflage.
This is a **laser?** Aw!
